

AUTOMATE AND FACILITATE CONTENT UPDATES

CHALLENGE

- Difficulty to update publications in real time and to track fine-grain changes.
- Manage the impact of content changes throughout publications.
- Manage data update priorities based on the relevance of links and according to user-defined update priorities.

BENEFITS

- Retain links, versioning and history of each content fragment.
- Content, topic and reference changes: impact and coverage analysis performed in the document repository.

SOLUTIONS

A Hub of links that enables to create, manage and exploit intelligent links to maintain the consistency of information throughout development activities, independently from the formalisms used.
